

Smart Minds, Smart Habitats

WHAT IS FUTURESAKE ?

The world we live in today is faced with a diverse set of challenges. Albert Einstein once said we can't solve problems by using the same kind of thinking we used when we created them. A creative thought process, relevant knowledge & applicable skills are of paramount importance to solve today's complex problems.

Welcome to FutureSake, where we aspire to inspire a future generation of solvers who will be equipped to tackle some of the most challenging global issues that come as consequences of urbanization. FutureSake is a journey for students wherein they progress from becoming aware of urban lifestyle concerns; to enabling themselves to address the concerns; to finally empowering themselves to be changemakers through taking decisive actions.

The Project

FutureSake is designed in a way that the young fellows understand challenges, find solutions and take proactive measures for sustainable living. Our guiding methodology helps them take step-by-step measures to achieve their goals at each stage and transform their ideas into action.

Throughout the FutureSake journey, the participants are enabled to come up with unique ideas for change in their homes, neighbourhoods, schools and cities. Participants are guided to form interest groups in their schools to put these ideas into motion.

Preparation

Participants take a closer look into a range of human activities like travel, recreation, household chores, community gatherings and so on to understand their effect on the environment and vice versa.

Inspiration

In the learning immersion participants are exposed to cities or habitats where individuals and organizations have taken encouraging steps to embrace a sustainable way of living, to potentially inspire a change in their own lifestyles.

PROGRAM INCLUSIONS

Training and Learning resources

FutureSake team facilitation across all stages

Partner Interaction and Workshops

Visa & Insurance

International Economy Air Travel

Accommodation, meals and local transport in Singapore

Entry tickets & licensed tour guide wherever applicable

PROGRAM FLOW
